EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: Move the 2nd paragraph in the Abstract on the last line of the 1st paragraph after –anisotropy.-

The correction is made because the Abstract must be in a single paragraph.

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The amendment of 12/28/2007 has been considered.
3. The claimed invention is a block copolymer composition having a hard segment block comprising a block formed from a vinyl aromatic hydrocarbon in the amount from 55 to 95 mass% and a soft segment block comprising a block formed from a conjugated diene in the amount of from 5 to 45 mass%, wherein the composition comprises a blend of components A and B in the ratio of A/B=20 to 80/80 to 20 (mass ratio), and wherein component A is a block copolymer comprises as monomer units, from 55 to 95 mass% of a vinyl aromatic hydrocarbon and from 5 to 45 mass% of conjugated diene and the hard segment block comprises blocks S1 and S2 having two types of different molecular weights specified in the claims, and component B is a block copolymer which comprises as monomer units, from 55 to 95 mass% of a vinyl aromatic hydrocarbon and from 5 to

Art Unit: 1796

45 mass% of a conjugated diene, and wherein the hard segment block comprises blocks S3 and S4 having two types of different molecular weights specified in the claims, and wherein the block copolymer is produced by a coupling reaction.

4. Upon reviewing the evidence of the records and applicants' remarks, it was found that the closest reference Patent 6,265,484 to Trepka et al does not disclose two hard segment blocks S1 and S2 having different molecular weight M1 and M2 and their ratio M1/M2 specified in the present claims for producing claimed component A, nor a blend thereof with a component B having two hard segment blocks S3 and S4 having different molecular weight M3 and M4 and their ratio M3/M4 specified in the present claims.

There is no motivation to combine the teachings of Trepka invention with Dominguez Patent 4,049,595 since Dominguez does not disclose the block structures specified in the present claims.

5. Other closest reference is JP 07-173232 (patent family to EP 0646607) inventors Trepka et al. The primary reference does not disclose the claimed blend of two components A and B having specified hard segment blocks S1 and S2 for producing a component a and hard segment blocks S3 and S4 for producing a component B.

There is no motivation to combine the teachings of these primary references with Dominguez Patent 4,049,595 since Dominguez does not disclose the block structures specified in the present claims.

Claims 1-14 are deemed to contain allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1796

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OLGA ASINOVSKY whose telephone number is (571)272-1066. The examiner can normally be reached on 9:00 to 5:30 pm.
